Upwork

## Professional Profile

Accomplished Flutter Developer with a robust track record of delivering high-performance mobile applications for both iOS and Android platforms using Flutter. Experienced in interpreting and executing client specifications to enhance application functionality and user experience. Proficient in employing state-of-the-art Flutter frameworks and tools to develop scalable and efficient applications, while consistently solving complex programming challenges. Skilled at all stages of the project lifecycle from conception to deployment, adept at working under tight deadlines and collaborating effectively with cross-functional teams. Committed to creating innovative solutions that not only meet but exceed client expectations.

## Core Skills

- Mobile Application Development
- Agile Project Management
- Dart, Type Script, Xcode
- API Integration

## Career Summary

Mar 2024 - Jun 2024

CNDO, Germany  
Senior Flutter App Developer

### Key Responsibilities

- Lead the development of feature-rich mobile applications using Flutter, focusing on robust architecture and efficient app state management.
- Collaborate closely with in-house designers to ensure front-end components align with design specifications, and translate design mockups into responsive and intuitive user interfaces.
- Partner with back-end developers to ensure seamless integration between front-end and back-end components, enhancing application performance and scalability.
- Implement and manage REST APIs for effective data fetching and updating, ensuring smooth communication with servers.
- Oversee the complete application lifecycle, emphasizing advanced problem-solving and state management to deliver high-quality, business-aligned mobile solutions.
- Support and maintain application functionality post-release, continuously enhancing stability and performance.
- Research and implement new technologies to improve application development efficiency and productivity.

### Key Achievements

- Successfully managed the integration of a new API version, replacing Firestore cloud functions for over 50 endpoints within three weeks, which significantly enhanced system efficiency.
- Reduced the loading time of the home screen from an average of 15-20 seconds to 1-3 seconds, dramatically improving user experience.
- Collaborated closely with the backend developer to redesign API calls and responses, effectively reducing the number of calls and optimizing data retrieval processes.

Jan 2024 - Mar 2024

Scholarly, Singapore  
Full Stack Engineer

### Key Responsibilities

- Lead the development of feature-rich mobile applications using Flutter, focusing on robust architecture and efficient app state management.

- Collaborate closely with in-house designers to ensure front-end components align with design specifications, and translate design mockups into responsive and intuitive user interfaces.
- Oversee the product architecture and development of the web application and manage the creation of email templates using cloud functions to enhance communication and user engagement.

## Key Achievements

- Successfully converted the state management of the entire project from Provider to BLoC in just one week, enhancing maintainability and performance.
- Integrated Very Good Ventures analysis and migrated the application to full type safety, significantly improving code reliability and future scalability.
- Implemented GoRouter in the project, optimizing navigation and maintaining consistency across the app.
- Continued to manage and update the existing email templates for cloud functions, ensuring reliable communication flows.

Sep 2023 - Jan 2024

Kreios, Luxembourg  
Senior Flutter Developer

## Key Responsibilities

- Lead the development of mobile applications using Flutter and Dart, focusing on robust, feature-rich implementations.
- Work with tools such as Apple TestFlight and Google Play Console for app testing and deployment.
- Convert Figma design mockups into functional Flutter widgets, ensuring fidelity to the original design specifications.
- Provide daily status reports and conduct quality assurance tests to maintain high standards of app performance and usability.

## Key Achievements

- Successfully accelerated the development timeline for a complex mobile application using Flutter, completing the initial version in just 2.5 months, significantly ahead of the expected 4-month schedule.
- Fostered strong collaboration within the development team, leading to seamless integration of application components and enhanced overall project efficiency.

Sep 2021 - Sep 2023

TiQuest, Luxembourg  
Flutter Developer

## Key Responsibilities

- Lead the development of mobile applications using Flutter and Dart, focusing on robust, feature-rich implementations.
- Work with tools such as Apple TestFlight and Google Play Console for app testing and deployment.
- Convert Figma design mockups into functional Flutter widgets, ensuring fidelity to the original design specifications.

## Key Achievements

- Successfully updated the application from Flutter 1 to Flutter 2, incorporating advanced features and enhancements to improve overall app performance and scalability.
- Implemented null safety during the Flutter migration, significantly increasing the reliability and stability of the application code.
- Maintained and enhanced a mobile application for 18 months, ensuring continuous operation and user satisfaction through regular updates and optimizations.
- Developed and launched a new mobile application in just three weeks using Flutter, Riverpod, and WebSocket API

## Education

Ankara University  
Bachelor's of Computer Engineering  
Oct 2020 - Jun 2024
